PROJECTS

Project – Aviva [BFSI UK (Insurance)]

Business use – The services are being used by the Aggregate service for calculating the premium.

1. Commercial Credit Rewrite
The project aims at rewriting the existing framework to spring boot. Key part of underwriting journey for commercial lines insurance. API obtains commercial credit info for a given company from Experian.
2. Location Risk – API Modernization and Data Migration
The project aims to rewrite the existing service to Spring-boot application and migrate data from existing db2 to PostgreSQL DB hosted in AWS infrastructure. For Data Migration, two new microservices were created and AcitveMQ was used for decoupling.
